The problem

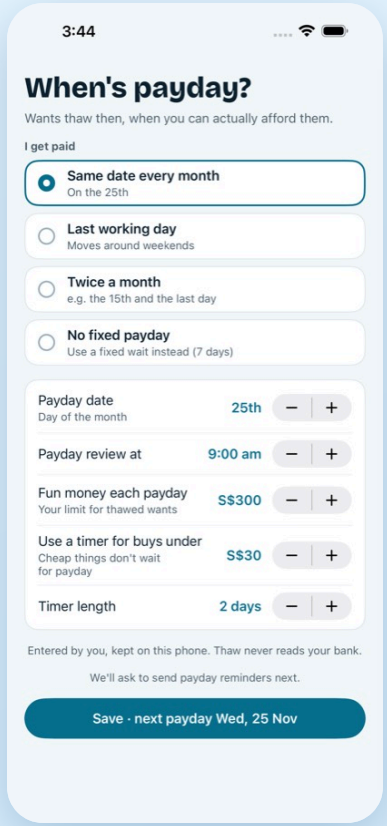

Impulse purchases happen in seconds. Regret lasts until the next bill.

- Thaw puts what you want "on ice" until payday, then you decide.
- Cubi, a small ice cube, reacts to your choices.

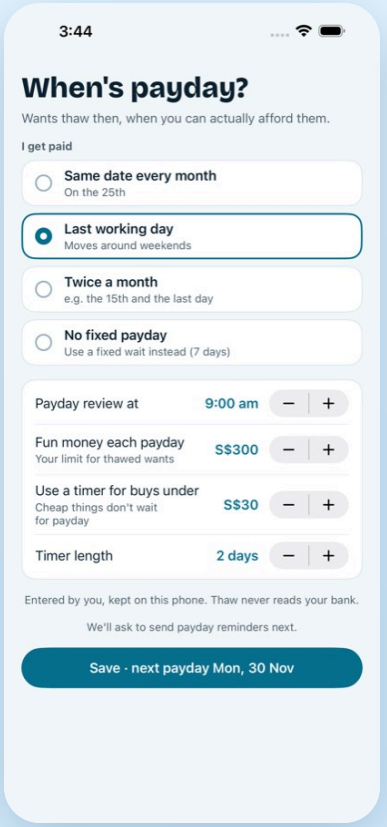

Set up in seconds: payday rules

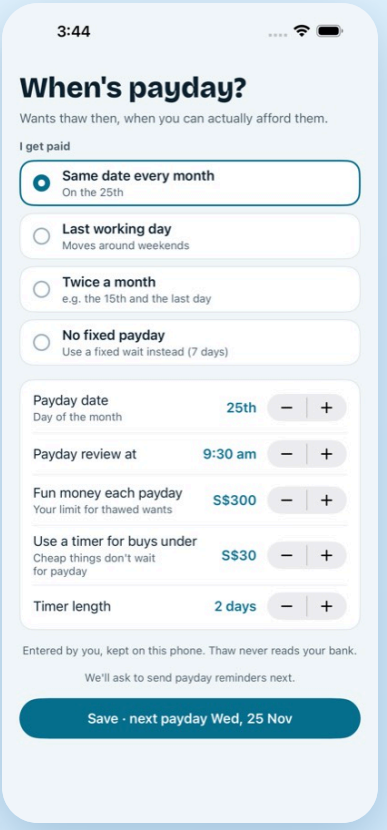

Pick how you get paid: fixed date, last working day, twice a month, or a fixed wait.

Onboarding

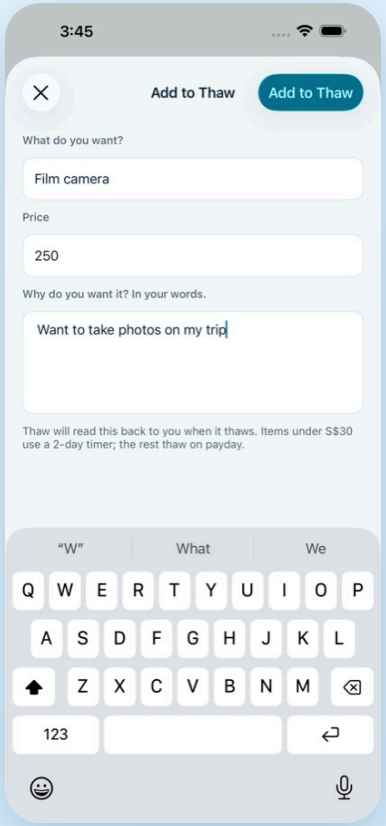

Last working day

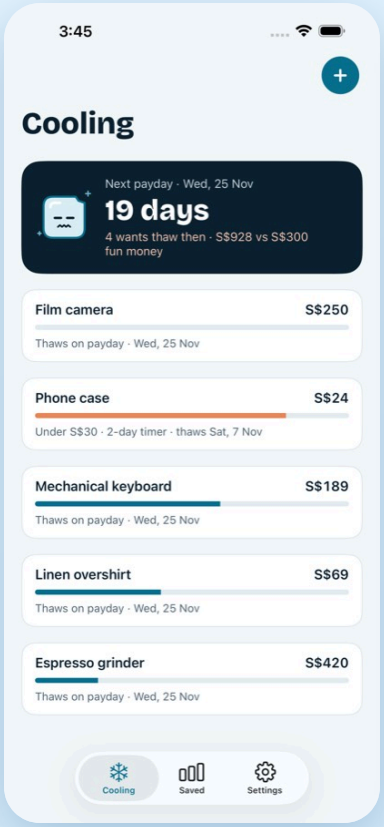

Adjusted date

Freeze a want

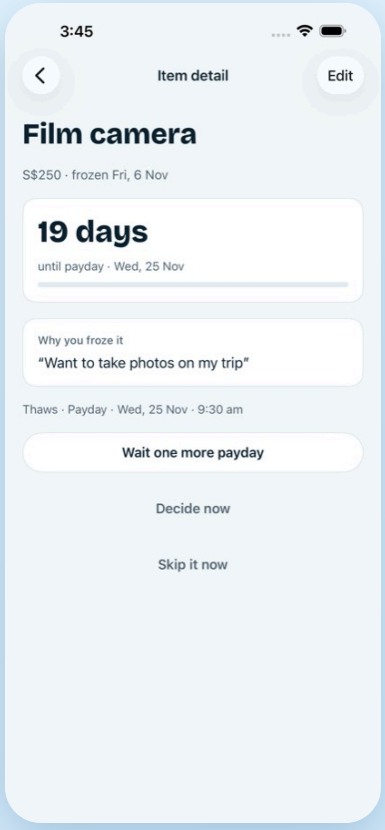

Add the item, its price and your reason. It starts cooling immediately.

Add a want

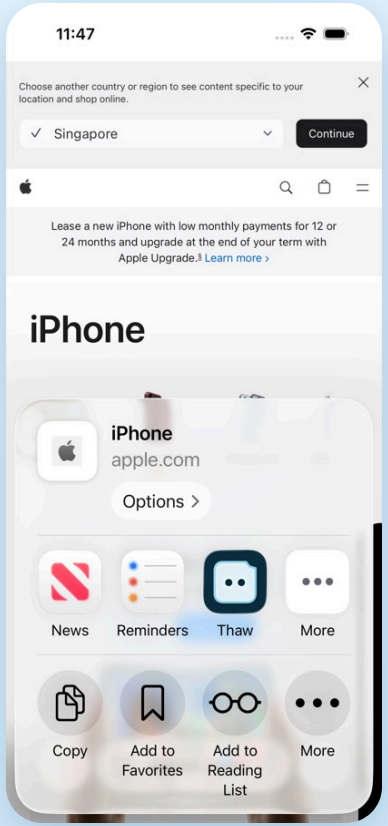

Cooling list

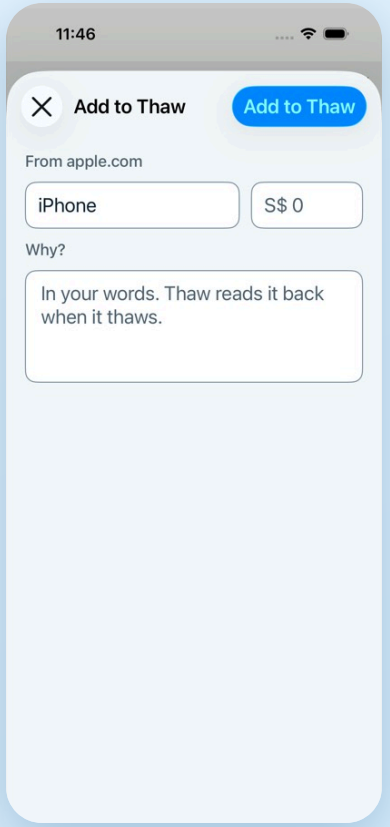

Item detail

Add from anywhere: Share extension

Share a page from Safari and it becomes a want, with its link kept.

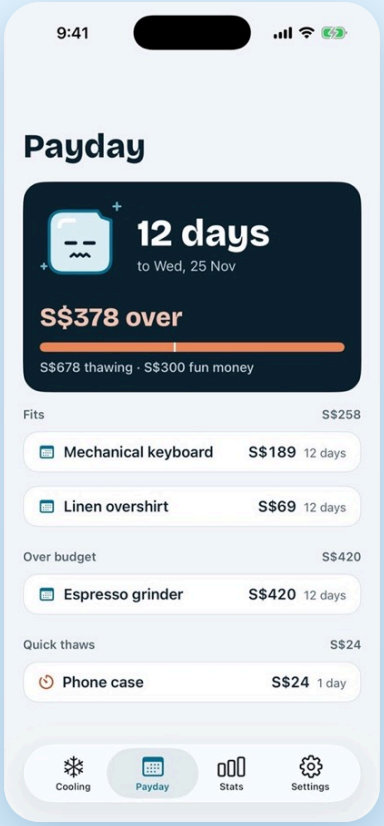

Share sheet

Thaw extension

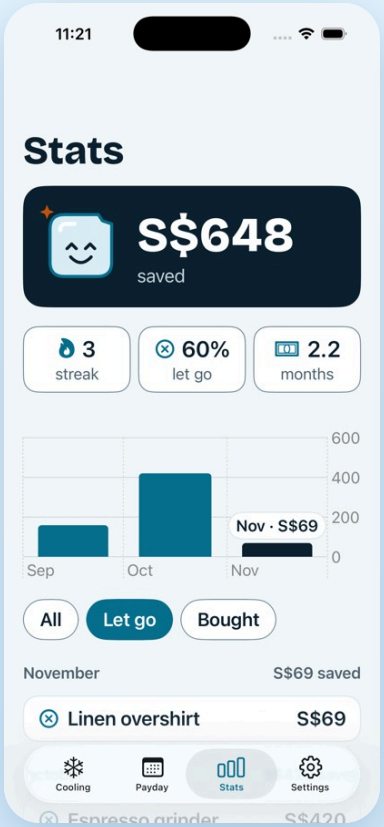

Let it cool

The Payday tab counts down. Small wants get a quick thaw of a few days.

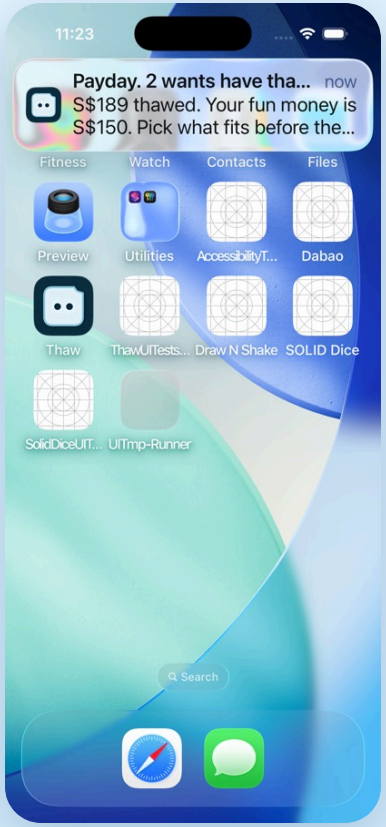

Reminders

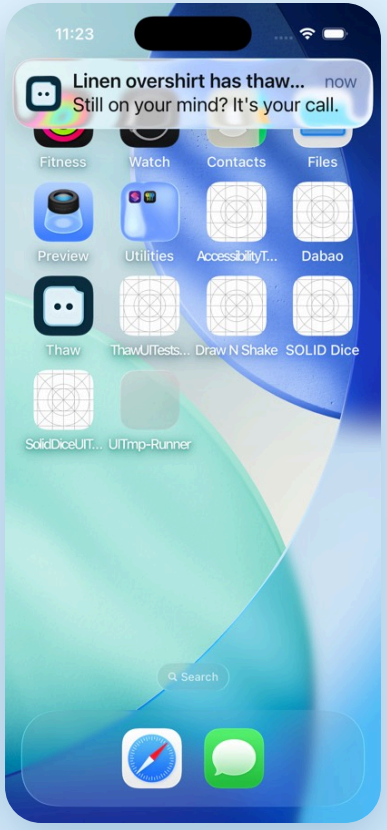

Local notifications fire when wants thaw, plus "Remind me tonight".

Built to be robust

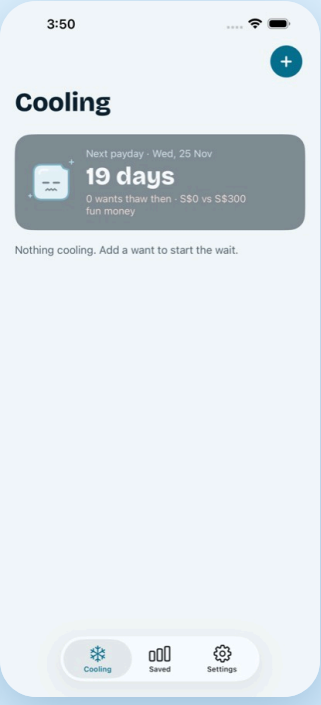

- Dynamic Type, VoiceOver actions, Reduce Motion support.
- No accounts, servers or analytics. Data stays on the device.
- Tested against persona walkthroughs (careful, lazy, hardcore) and accessibility audits.
